

■ ORTHOFIX SPECIALITY CLINIC

BigRock Domain & cPanel Shared Hosting Guide (PHP & SQLite Edition)

Overview: This guide provides step-by-step instructions for deploying the ORTHOFIX Pharmacy & Clinic Management System on **BigRock Linux Shared Hosting (cPanel)** using native **PHP (7.4+ / 8.x)** and **SQLite3** without requiring Node.js daemons.

■ System Requirements & Prerequisites

Component	Requirement	Status
Domain Name	orthofixspecialityclinic.com / .info	Active
Hosting Provider	BigRock Linux Shared Hosting (cPanel)	Supported
PHP Version	PHP 7.4, 8.0, 8.1, 8.2, 8.3+	Standard
PHP Extensions	pdo, pdo_sqlite, openssl, json, mbstring	Pre-installed
Database Engine	SQLite 3 (database/pharmacy.db)	Embedded

Step 1: Configure Domain Name Servers (DNS)

1. Log into your **BigRock Control Panel** (www.bigrock.in).
2. Navigate to **Domains** -> Select **orthofixspecialityclinic.com**.
3. Click **Name Servers** and set them to BigRock Linux Hosting defaults:
 - dns1.linuxhosting.bigrock.in
 - dns2.linuxhosting.bigrock.in

Step 2: Add Hosting DNS A Records

1. In BigRock Panel under **Manage DNS Records**, click **+Add A Record**.
2. Add Record 1 (Root Domain): Host Name = @, IPv4 Address = 66.116.229.191, TTL = 7200.
3. Add Record 2 (WWW Subdomain): Host Name = www, IPv4 Address = 66.116.229.191, TTL = 7200.
4. Click **Save DNS Records**.

Step 3: Upload Project ZIP to cPanel

1. Log into BigRock cPanel (<https://orthofixspecialityclinic.com:2083>).
2. Open **File Manager** under *Files* and enter the public_html directory.
3. Click **Upload** and select orthofix-pharmacy-working-project.zip.
4. Once upload reaches 100%, right-click the zip file in cPanel and click **Extract**.
5. Verify files exist in public_html: index.html, setup.php, index.php, .htaccess, api/, database/.

Step 4: Verify Folder Permissions

1. In cPanel File Manager, verify the database/ folder permissions are set to 0755.

2. Verify .htaccess file permissions are set to 0644.

Step 5: Run 1-Click Interactive Health Verification

1. Open your browser and visit: <https://orthofixspecialtyclinic.com/setup.php>.
2. The installer will test PHP extensions and automatically create SQLite tables & seed accounts.
3. Click ■ **Launch ORTHOFIX Application** when green PASS badges appear.

Step 6: Activate Free SSL Certificate (HTTPS)

1. In cPanel, navigate to **Security** -> **SSL/TLS Status**.
2. Select your domain checkbox and click **Run AutoSSL**.
3. Green SSL lock icons will activate within 1-2 minutes.

■ Pre-Configured Default Login Credentials

Role / Position	Username	Password	Permissions
Admin / Billing Manager	admin	Admin@123	Full System & Reports
Billing Worker	worker	Worker@123	POS Checkout & Sales
Doctor	doctor	Doctor@123	Consultations & RX
OP Receptionist Worker	receptionist	Worker@123	Patient Queue & Tokens
Super Administrator	superadmin	Admin@123	System Superuser
